SUMMARY

Full Stack Developer (current university student) with proven experience delivering real-world client projects across frontend and backend development. Proficient in Python, Django, FastAPI, React, and Next.js, with hands-on use of AI-assisted development tools including Cursor and GitHub Copilot to produce clean, production-ready code. Strong problem-solving and self-management skills honed through freelance work on international client projects in a fully remote environment.

EXPERIENCE

Freelance Full Stack Developer

Feb 2026 – Present

Self-Employed (Fiverr) | fiverr.com/najib_dev_ai

- Delivered end-to-end full-stack web applications for international clients using Django, FastAPI, and React; designed scalable REST APIs and integrated AI-powered features using Cursor to ship production-ready solutions in remote environments.
- Translated client requirements into clean, maintainable code through strong problem-solving, clear communication, and consistent self-management across multiple concurrent freelance projects.

Co-Founder

Jun 2024 – Present

AI Extension | aiextension.org

- Co-founded a student-led platform focused on AI, software development, and emerging technologies; built AI-driven tools and real-world automation solutions for student developers.
- Organized and led workshops on Python, machine learning, and modern development practices, growing technical skills across the community.

PROJECTS

Organic E-Commerce Platform with RAG AI Chatbot

- Built a full-stack e-commerce platform with a Retrieval-Augmented Generation (RAG) chatbot for intelligent product discovery, integrating frontend and backend seamlessly.
- Tech Stack:** React, Django REST Framework, PostgreSQL, Sentence Transformers, Groq LLaMA 70B

AI-Enhanced Online Voting System

- Developed a secure online voting system with JWT-based authentication and AI-driven analytics, covering full frontend and backend implementation.
- Tech Stack:** Django REST Framework, React, JWT

AI-Powered Resume Screening System

- Created a FastAPI-based AI service for automated resume screening with explainable scoring and batch processing.
- Tech Stack:** FastAPI, React, Python, LLM APIs

EDUCATION

B.Sc. in Electronics and Communication Engineering

Jan 2023 – Present

Hajee Mohammad Danesh Science and Technology University (HSTU), Bangladesh

SKILLS

Programming & Backend: Python, Django, Django REST Framework, FastAPI, REST API Design, SQLAlchemy

AI & ML: RAG Pipelines, LLM Integration, Prompt Engineering, Sentence Transformers

Frontend: Next.js, React, Vite, HTML, CSS, Bootstrap, Tailwind CSS

Databases: PostgreSQL (Supabase), SQLite, MongoDB, Firebase

Tools & DevOps: Cursor, Git, GitHub Actions, JWT, Vercel, Netlify, Postman

Practices: Agile, SDLC, CI/CD (basic), Version Control, Remote Collaboration, Self-Management

CERTIFICATIONS

LFS101: Introduction to Linux – The Linux Foundation

Apr 2026

Full Stack Web Development with Python, Django and React – Ostad

Aug 2024 – Jul 2025

CS50's Introduction to Programming with Python – Harvard University

Jun 2024 – Sep 2024

VOLUNTEERING

IT Secretary – ECE Club of HSTU

Feb 2025 – Oct 2025

IT Secretary – HSTU Career Club

Jan 2025 – Oct 2025
